Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

The site is a Household, commercial and industrial waste transfer station that was regulated under the old waste management licence: 55/26/35. The permit also accepts waste metals and end of life vehicles.

This variation increases the annual tonnage processed on site to 75,000 tonnes per annum, without increasing waste stored, and updates the old licence to modern conditions.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
